Fund Performance Report for Series 1 (Oct 2025 – Dec 2025)

Fund Performance Review (October 2025 – December 2025)

The FBMKLCI recorded its strongest monthly gain in December 2025, rising 4.7% Month-on-Month (MoM) to 1,680 points, lifting its full-year 2025 performance to a positive 2.3%. This marked the index's second consecutive year of positive returns, achieved despite an 81% MoM increase in foreign net selling, which was offset by sustained buying from domestic institutional investors. Foreign investors were the largest net sellers, with cumulative outflows rising to RM22.3 billion in 2025 which is 5.3x higher Year-on-Year (YoY) than RM4.2 billion in 2024. As a result, foreign shareholding by market capitalisation declined to 19.0% in December 2025 from 19.7% in December 2024. Local institutions were the largest net buyers, recording cumulative net buying of RM20.9 billion in 2025, up 1.8x YoY from RM11.6 billion in 2024. The top-performing sectors in 2025 were Plantation (+8.8%), REITs (+8.3%), and Financial Services (+2.8%), while the worst-performing sectors were Healthcare (-35.9%), Technology (-14.5%), and Telecommunications (-13.6%).

On the corporate front, Mr DIY Group (M) Bhd posted an 11.9% rise in net profit for the third quarter, driven by stronger gross profit margins and higher revenue from new store openings. Total outlets amounting to 1,528 as at September 30, 2025, up 10% YoY. The margin expansion was attributed to lower average inventory costs from economies of scale and a firmer ringgit. Net profit climbed to RM136.12 million from RM121.65 million a year earlier, as gross profit margin improved to 47.3% from 45.4%. IHH Healthcare Bhd's net profit rose 15.36% to RM616 million for the third quarter ended September 30, 2025 (3QFY25) from RM534 million a year earlier, supported by stronger contributions from day care services and improved cost containment, particularly in Malaysia and India.

Series 1 underperformed against the benchmark return of 1.5% during the period with a return of -1.0%, mainly attributed by the underperformance of the top three sectors in our portfolio (Dana Makmur and Dana Maa'rof). The Malaysia Technology index (KLTEC) and Malaysia Construction Index (KLCON) was down by -3.3% and -8.9% respectively while the Malaysia Industrial Production Index (KLPRO) was slightly up by 1.8% during the period.

Market Outlook & Strategy (October 2025 – December 2025)

Outlook

Growth expectations for 2026 remained around 4.5%, driven by strong consumer and tourism momentum. Despite external trade headwinds and policy uncertainty globally, the domestic outlook remains cautiously positive, anchored by resilient internal demand, policy continuity, as well as targeted fiscal support and infrastructure push.

Strategy

Our strategy for 2026: Overweight structural winners; selectively trade cyclical rebounds and themes with valuation discipline. We will also continue to overweight high credit quality corporate Sukuk over government and government guaranteed papers for yield pickup.
