Fund Performance Report for Series 2 (Nov 2025 – Jan 2026)

Fund Performance Review (November 2025 – January 2026)

FBMKLCI started 2026 on strong footing, rising for four consecutive weeks to close January at 1,741 points (+3.6% month-on-month). January 2026 saw broadly positive performance across most global and regional equity markets, except for Indonesia's JCI (-3.7% mom). Foreign investors emerged as the second-largest net buyers, recording net inflows of RM1.05 billion, reversing a net sell of RM2.0 billion in December 2025. Local institutions were the largest net buyers, with a net buy of RM1.06 billion, while retail investors recorded a net sell of RM2.2 billion during the month. Meanwhile, average daily trading value (ADTV) rose 21% year-on-year and 43% month-on-month to RM2.5 billion from RM2.2 billion in December 2025. Sector performance was led by the Property (+9.3%), Finance (+9.2%), and REIT (+5.8%) sectors, while Healthcare (-2.5%), Construction (-2.2%), and Energy (-1.1%) were the weakest performers. Most Bursa key indices recorded positive gains with exception to FBMAACE, ending the month in negative territory (-3.1%).

On the corporate front, Deleum Bhd's 90%-owned indirect subsidiary Turboservices Sdn Bhd has secured a 6-year contract to service solar turbine turbomachinery for Petroliam Nasional Bhd's (PETRONAS) exploration arm, PETRONAS Carigali. The contract, which commenced on Nov 8, came with an option for PETRONAS Carigali to extend the contract for a further 3 years. Capital A Bhd has obtained the High Court's approval for its proposed RM2.7 billion capital reduction, paving the way for the distribution of AirAsia X Bhd shares to the company's entitled shareholders. The approval is among the final milestones in Capital A's restructuring, following its aviation consolidation agreements with AAX becoming unconditional in October 2025 and the announcement of the dividend-in-specie entitlement details.

Series 2 underperformed against the benchmark return of +1.5% during the period with a return of -2.54%, mainly attributed by the fund's substantial exposure in the Technology sector in our portfolio (Dana Makmur and Dana Maa'rof). The Malaysia Technology index (KLTEC) was down by -10.9%, making it the worst performing sector during the period under review.

Market Outlook & Strategy (November 2025 – January 2026)

Outlook

In the US, Kevin Warsh's nomination as the next Federal Reserve Chairman has intensified scrutiny over policy credibility alongside political pressure for faster rate cuts. Meanwhile, escalating trade tensions driven by US tariff policies are complicating the inflation path and currency outlook. The combination has pushed the USD to its weakest level since 2022, with US equities lagging regional peers while safe-haven assets such as gold and silver rallied. Malaysia stands out as a relative outperformer, supported by stronger-than-expected 4Q25 GDP growth of 5.7%, a strengthening MYR, resilient E&E exports, and sustained data centre-driven investment. Bank Negara Malaysia's decision to hold the policy rate at 2.75% signals confidence in the growth-inflation balance and reinforces the macro.

Strategy

We will continue to favour structural winners while selectively positioning for cyclical opportunities. We will also continue to overweight high credit quality corporate Sukuk over government and government guaranteed papers for yield pickup.
